

Mandatory stand-up talk

Feb. 25, 2004

Oxi Clean will mail 75,000 samples through March

USPS managers must deliver this stand-up talk on the Oxi Clean sample mailing to all available employees, beginning immediately and repeating as necessary until all employees have received this message.

This message is being sent to alert facilities of this mailing and to avoid undue stress for our employees and disruption of service should one of these packages be damaged or broken.

Samples of the powdered cleaner Oxi Clean could be headed to our postal facility. Oxi Clean will mail 75,000 product samples to customers through March. An initial mailing of 20,000 went out Feb. 18.

The Oxi Clean mailpiece (**hold up the picture of the mailpiece – page 2 of this stand up talk**) is a white flat, approximately 6 1/2 by 8 inches, sent Standard Mail from Colorado Springs, CO.
